Universal element formation — Science Learning Hub

“We’re literally the ashes of long dead stars,” says Sir Martin Rees, Professor of Cosmology and Astrophysics, University of Cambridge. As stars evolved in space after the Big Bang, nuclear reactions occurred that transformed hydrogen and helium, formed as a result of the Big Bang, into the elements as we know them.

The Life Cycle of Stars

Task #1: 1) You will begin your webquest by learning how to identify stars by their magnitude, color, and temperature, and spectral class. Click Stars: Lights in The Sky and write out the answers to the following questions on a sheet of white construction paper to be turned in. 2) - Name the brightest star in the known universe.
